YOGENDRA MAJJARI

GTM Engineer | AI Automation Specialist | RevOps | CRM | MarTech

Building AI agents and revenue systems (n8n, Claude API, Python, Supabase) | End-to-end systems owner, zero dependency on marketing or ops

Hyderabad | +91 9885664187 | yogendra.majjari241998@gmail.com | linkedin.com/in/yogendramajjari-4a1768270 | yogendra-interactive-portfolio.vercel.app

OPEN TO: GTM Engineer • AI Automation • RevOps • CRM Manager • MarTech / Marketing Ops

PROFESSIONAL SUMMARY

GTM and RevOps professional with 4+ years building the systems behind revenue: AI agents, automated lead pipelines, CRM architecture and campaign automation. I start with the business problem, decide what is worth automating, then build and run it with Claude API, Python, n8n and Supabase. Built a custom CRM that replaced paid SaaS, a 5-agent campaign system with human approval, and intelligence tools that run around the clock. Combines hands-on CRM and marketing-ops experience (HubSpot, Zoho, Salesforce) with the ability to build integrations independently.

ROLE-ALIGNED EXPERTISE

GTM Engineering	Built end-to-end GTM systems: automated lead scraping, enrichment and outreach pipeline; 5-agent campaign system (planning, content, creative, execution, reporting) on n8n, Claude API, Python.
AI Automation	Production AI agents and multi-step workflows with human approval gates, validation and live alerts; Claude API prompts, webhooks, REST APIs, Supabase; 24/7 monitoring bots.
RevOps	Three-stage pipeline reporting (raw, qualified, closure/payment) across marketing, pre-sales and sales; lead routing, lifecycle tracking, real-time dashboards, data hygiene.
CRM	Administered Zoho, HubSpot, Salesforce, MDS; built a custom CRM on Supabase + n8n (RLS, schemas, webhooks) replacing paid SaaS; CRM data and workflow migration with backups.
MarTech	Email and campaign automation (n8n, Resend API, Mailchimp, Woodpecker); UTM and GA4 campaign tracking; Looker Studio dashboards; Apollo, ZoomInfo, Lusha, Sales Navigator stack.

CORE SKILLS

AI & Agent Architecture: Claude API, prompt and system-instruction design, agent design, human-in-the-loop approval, n8n orchestration, webhook-driven automation, REST API integrations, Python

CRM & RevOps: Zoho, HubSpot, Salesforce, MDS, custom Supabase CRM; lead routing, lifecycle and pipeline reporting, data segmentation and hygiene

MarTech & Analytics: Resend, Mailchimp, Woodpecker, UTM and GA4 tracking, Looker Studio, Excel, Google Sheets, Google Ads, HTML/CSS for email and web

Data & Backend: Supabase, PostgreSQL, relational modeling, row-level security, 24/7 scraping and monitoring pipelines (public and gated portals)

Sales Intelligence: Apollo, ZoomInfo, Lusha, LinkedIn Sales Navigator, RocketReach, D&B, Apify; account-based targeting and decision-maker mapping

Build & Deploy: Claude Code, Google Apps Script, Vercel, Figma, Lovable

KEY ACHIEVEMENTS

- **AI Automation Agents Suite:** Architected and deployed agents on Python backends with HTML interfaces, using Claude API for processing and n8n for orchestration, covering lead scraping and enrichment, report generation and outreach drafting. Adopted across the wider team.
- **Custom CRM:** Designed and deployed a proprietary CRM on Supabase and n8n with relational schemas, RLS and webhooks, eliminating third-party SaaS subscription costs.
- **Growth Machine Pipeline:** Automated scraping, cleaning and CRM upload of 1,000+ verified leads weekly, lifting outbound meetings by 40%.
- **High-ROI Pipeline:** Built a ₹100Cr pipeline on ₹20K in annual tool investment (5x ROI).
- **Campaign Automation:** Automated lead generation and email campaigns through n8n and Resend's developer-first email API, reducing manual effort by 60%.
- **Reporting Infrastructure:** Designed a three-stage escalation reporting system (raw, qualified, closure/payment) that improved pipeline visibility across marketing, pre-sales and sales.
- **Also delivered:** a complete e-commerce front end in 8 days (Claude Code, Figma); an IT Asset Disposal (ITAD) initiative identifying organizations for asset disposal.

MULTI-AGENT CAMPAIGN AUTOMATION SYSTEM

Five connected AI agents covering the full campaign lifecycle, built independently and at zero software cost.

- **Planning Agent:** multi-channel campaign plans (email, newsletter, ads, WhatsApp, cold calling) with targeting, sequencing and channel mix.
- **Content Agent:** drafts copy and messaging, routed to the Content Manager for approval before deployment.
- **Creative Agent:** generates campaign creatives and visual assets.
- **Execution Agent:** deploys campaigns across channels, including email through Resend.
- **Reporting Agent:** generates performance reports and dashboards with live alerts.

BUSINESS INTELLIGENCE PLATFORMS & TOOLS BUILT

- **Re-Extractor:** Google-Maps-style business intelligence tool returning address, coordinates, website, social channels, ratings, images and category, enriched with AI insights.
- **Recykal Atlas:** geospatial platform reporting population and device density within a radius, linked to CPCB, SPCB and state solid-waste portals to show daily waste generation by material and region.
- **EPR Readiness Score:** assessment tool that stages a company's EPR compliance and returns strengths, weaknesses, risks and tailored next steps for outreach.
- **Auction Alert Digest and 24/7 Tender Monitor:** consolidates public and gated tender and auction portals across EPR, scrap marketplace, ITAD and alternative fuels (AFR) into one feed, replacing a paid aggregation platform.
- **Market Intelligence Alerts:** newspaper-style page tracking scrap pricing and trends in India and international markets.
- **Three Vertical Websites:** designed and deployed live EPR, Recommerce and Marketplace sites using Claude Code on Vercel.
- **Internal HR Alerts Tool:** trigger-based internal mailing system built with Google Apps Script.

LEADERSHIP & OWNERSHIP

- **Zero-support ownership:** conceived, built and shipped the agents, CRM and intelligence platforms with no dedicated engineering team.
- **Cross-functional builder:** studied marketing, pre-sales and sales workflows and built tools those teams adopted directly.
- **Adoption driver:** turned a personal automation project into a team standard through hands-on training and feedback.

PROFESSIONAL EXPERIENCE

Senior Executive, Lead Generation & Acquisition | **Recykal** — **2024 – Present**

- Built a non-social listening bot scraping web and social posts by intent keywords, with daily sentiment dashboards and AI email briefings.
- Integrated Apollo, Lusha, ZoomInfo and Sales Navigator into outbound pipelines, saving 20+ hours weekly.
- Identified CPCB-registered companies with EPR shortfalls; validated data and mapped decision-makers for pre-sales.
- Administered Zoho, HubSpot and MDS CRMs: lead creation workflows, routing rules and real-time dashboards.
- Built and maintain the intelligence platforms listed above (Re-Extractor, Atlas, EPR Score, Auction Alert Digest).

Concurrent project role: Full-Stack Automation & Front-End Specialist

- Designed the Supabase CRM schema (leads, accounts, pipeline stages); connected n8n via webhooks and REST APIs for alerts, status updates and live lead sync.
- Implemented row-level security for multi-user access and clean data; built Figma prototypes and live websites on Vercel.

Market Research Analyst | **Silicon India** — **2022 – 2024**

- Delivered market research, competitor analysis, segmentation and market sizing for product and marketing strategy.
- Built and validated B2B contact databases for US-market campaigns; ran large-scale scraping with data hygiene protocols.
- Built keyword-driven databases for consumer insights and supported research reporting.
